**306th COVID-19-related Fatality Reported;
COVID-19 Test Results: 623 New Cases, 52 Hospitalized;
Additional COVID-19 Updates; Food Commodities Distribution Continues**

306th COVID-19-related Fatality Reported

Today, the Joint Information Center was notified that Guam's 306th COVID-19-related fatality was pronounced dead on arrival at the Guam Memorial Hospital (GMH) on February 10, 2022. The patient was an 83-year-old male, vaccinated, with underlying health conditions who tested positive on February 6 and again on February 10, 2022.

"Tonight we mourn another loved one lost to this deadly virus, and we are reminded that the fight is not yet over," said Governor Lou Leon Guerrero. "To his family and friends, Jeff, Josh, and I extend our deepest sympathies and condolences during your time of grieving and sadness. To our community, we call on each of you to recommit to the public health interventions that have brought us to where we are today."

DON'T WAIT UNTIL IT'S TOO LATE.

Look for emergency warning signs for COVID-19. Call 911 if you have trouble breathing, persistent pain or pressure in the chest, new confusion, inability to wake or stay awake, or bluish lips or face. Individuals who are sick are advised to:

- Stay home, except to seek medical care. Call ahead before visiting the clinic/doctor.
- Monitor for symptoms of COVID-19 including fever, cough, and shortness of breath, fatigue, body aches, headaches, loss of taste or smell, sore throat, congestion, nausea and/or diarrhea.
- Get tested if you have symptoms of COVID-19. While waiting for test results, you should stay away from others, including staying apart from those living in your household.

Older Adults, People with Serious Chronic Medical Conditions are Most at Risk for Serious Complications and Death Due to SARS-CoV-2/COVID-19

Serious chronic medical conditions include:

- Heart disease
- Diabetes
- Lung disease
- Obesity
- Immunocompromised conditions (e.g. cancer, lupus)
- Chronic renal disease
- Neurologic or neurodevelopmental condition
- Current or former smoking
- Chronic liver disease

52 Hospitalized for COVID-19

CENSUS as of 5 p.m.	GMH	GRMC	USNH	TOTAL
COVID-19 Admission	29	18	5	52
Pediatric Admissions	1	-	-	1

ICU	4	2	1	7
Ventilator	2	2	0	4

VACCINATION STATUS	VACCINATED	UNVACCINATED	INELIGIBLE (0-4 years old)
Hospitalized	26	24	2
Total in Population*	133,848	7,759	12,229
Rate per 100,000 Population	19	309	16

SPECIAL NOTE: Based on today's data, if we were to compare two (2) hypothetical populations of 100,000 people each, vaccinated versus unvaccinated, there would be 19 vaccinated people hospitalized for COVID-19 compared to 309 unvaccinated people hospitalized for COVID-19. The risk of being hospitalized for COVID-19 is about 16 times higher for the unvaccinated as compared to the vaccinated. *Estimated population is based on DPHSS Immunization Program analysis of 2020 Census data. Updates are expected pending further Census 2020 data breakdown.

COVID-19 Test Results: 623 New Cases of COVID-19

Today, the Department of Public Health and Social Services (DPHSS) reported **623** new cases of COVID-19 from **1,755** specimens analyzed on February 10, 2022. **75** of the cases reported today are through the Department of Defense. To date, there have been a total of **39,295** officially reported cases, **306** deaths, **7,083** cases in active isolation, and **31,906** not in active isolation.
